

Fall Creek Falls State Park Campground Renovation Announced

Fall Creek Falls State Park is pleased to announce the construction phase of a major campground renovation will begin in December 2008 and should be completed in December 2009.

The project includes the renovation of all remaining sites in Area "B" that were not renovated in Phase 1. Bathhouses #1 and #2 in Area "B" are scheduled to be upgraded and renovated also. Many of the sites in "B" area will be redesigned to allow easier entrance with a more level surface. Area "D" will receive a brand new bathhouse as well as upgrades to several sites in that area. Both of these areas will receive new paving of the sites and roadways, additionally there will be limited paving in other areas.

The downside to such a major renovation is the necessity of the total closing of all campsites in the affected areas for the duration of the construction phase. Area "A", "E", and "C" should remain open throughout the project. However it is recommended to check with the park (800-250-8611) prior to your visit to check for last minute changes.

During this renovation process, Fall Creek Falls State Park will not be taking any camping reservations. We expect this "No Reservations" policy to remain in effect for the calendar year 2009 only. The park apologizes for the inconvenience this will cause our dedicated campers but feels it is necessary due to the large number of "reservation" sites that will be closed.

We are excited about what these renovations will mean to the future of camping at Fall Creek Falls and ask that everyone bear with us during these "improving" times.
